

Arnold Z. Adeva – Fullstack Junior Web Developer

+63 965 3891 629 | arnoldadeva.dev@gmail.com | GitHub:ctrl-Anode | Calapan City, Oriental Mindoro, Philippines

PROFESSIONAL SUMMARY

Information Technology graduate with experience in AI assisted software development for fast paced development applying agile methodologies with continuous feedback , experienced in web development, machine learning and embedded systems. Skilled with Vue.js , Node.js and Python with fair knowledge of programming PHP, Java , and C++. Experienced on developing real-world practical technology solutions, logical applications, and collaborating with stakeholders to improve the system efficiency. Committed to building innovative digital solutions through adaptability, continuous learning and strong problem solving that solve practical, real-world problems.

WORK HISTORY

OIKOS SIL Intern October - November 2025

TESDA BCRV TECH-VOC, INC – JAVA PROGRAMMING

- Developed an interactive web-based educational platform using Java, Vue.js (Vite), and Firebase, delivering an engaging learning environment that enhanced early literacy and phonetic development for children aged 3 to 7.
- Integrated real-time text-to-speech functionality and designed a multisensory, child-friendly user experience, enabling independent phonetic exploration, improving word recognition, and increasing learner engagement.
- Deployed and maintained the application using Vercel and GitHub, while producing comprehensive technical documentation, user guides, and stakeholder presentations that ensured reliable delivery, simplified knowledge transfer, and effectively communicated the system's architecture and project progress.

Programmer OJT Intern February – April 2026

MINA DE ORO MOTORS INCORPORATED – ISUZU CALAPAN

- Developed a web-based Enterprise Resource Planning (ERP) platform using Vue.js (Vite), Node.js, and Firebase streamlining business operations through department-specific modules that improved organizational management and workflow efficiency.
- Implemented a multi-layered security framework featuring role-based access control (RBAC), granular CRUD permissions, and rigorous input validation, strengthening data security and ensuring controlled access across all system modules.
- Collaborated with cross-functional departments to gather business requirements, optimize system usability, and deliver employee training through system demonstrations, while providing technical support and resolving hardware, software, and minor networking issues to ensure smooth system adoption and daily operations.

PROJECT HISTORY

AeroTech: An IoT-Based Aeroponics Management System Using Sequential CNN

Technologies: Vite+Vue.js, Flask, TensorFlow, Firebase, Tailwind CSS, PWA, C++, Microcontroller, Sensors, Actuators, Modules

- Developed a full-stack aeroponics management system using Vue.js, Flask, TensorFlow, and Firebase, delivering real-time environmental monitoring, crop management, analytics dashboards, and AI-powered lettuce disease detection to improve farming efficiency and decision-making.
- Implemented secure authentication, cloud data synchronization, progressive web application (PWA) capabilities, push notifications, and RESTful API integration, enabling reliable remote monitoring, automated disease prediction, and real-time sensor data visualization for enhanced system accessibility and operational efficiency.

OJT System Project – ISUZU ERP System

Technologies: Vite+Vue.js, Tailwind CSS, Node.js, Express, Firebase, MySQL, PM2

- Developed a web-based ERP System using Vue.js, Express.js, Firebase, and MySQL, implementing inventory, stock transaction, user management, reporting, and dashboard modules to streamline business operations and improve administrative efficiency.
- Implemented Role-Based Access Control (RBAC) with authentication, authorization, and granular permission management, and configured automated deployment using PM2, ensuring secure user access, reliable background execution, and continuous system availability over a local network.

EDUCATION

Bachelor of Science in Information Technology Mindoro State University Calapan Campus Masipit, Calapan City, Oriental Mindoro	2022 - 2026	Secondary Education Ceriaco A. Abes Memorial National High School MNP, Calapan City, Oriental Mindoro	2016 - 2020
Senior High School - STEM Oriental Mindoro National High School San Vicente East, Calapan City, Oriental Mindoro	2020 - 2022	Primary Education Adriatico Memorial School Leuterio, Calapan City, Oriental Mindoro	2010 - 2016

SKILLS

- Programming Languages: JavaScript, Python, PHP
 - Frontend Development: Vite+Vue.js, Tailwind CSS
 - Backend Development: Node.js, Express.js, REST APIs
- Tools & Platforms: VS Code, Git, GitHub, Firebase, Postman
 - AI Technologies: ChatGPT, Gemini, Copilot
 - Soft Skills: Adaptability, Problem Solving, Continuous Learning
- Database Technologies: Firebase Firestore, Firebase Realtime DB, MySQL
 - Others: API Development/Integration, IOT & Embedded Systems

CERTIFICATIONS

- JAVA Programming NCIII Certification
- Microsoft IT Specialist Data Analytics Certification
- CodeChum Python Programming 2 Certification
- Fortinet Certified Associate in Cybersecurity Certifications
- Internship Completion Certificate
- Internship System Completion Certificate

INTERESTS

- Web Development
- Artificial Intelligence & Machine Learning
- Internet-of-Things & Embedded Systems
- Innovation & Emerging Technologies
